Programat® CS2
Software Revision Log

Version	Changes from previous version	Status
V4.3 12.01.2024	**Software optimized** • Various software optimizations	Currently delivered version
V4.2 11.03.2019	**Software optimized** • Optimized parameters for IPS Empress CAD with IPS e.max CAD Crystall. • Optimized vacuum test program • Optimized dehumidification-function • More special characters • Acoustic feedback of touchscreen • Various languages have been improved • Various software optimizations	No longer available
V4.1 01.02.2018	**Software optimized** • Push function can be tested • Various languages have been improved • Various software optimizations	No longer available
V4.0 28.04.2017	**Software optimized** • New program structure with new program parameters • Various software optimizations	No longer available
V3.0 08.04.2016	**Software optimized** • In-process dehumidification: Function that protects the vacuum system from contamination and its consequential damages • Various software optimizations	No longer available
V2.1 09.04.2015	**Software optimized** Various software optimizations	No longer available
V2.0 01.10.2014	**Software optimized** Various software optimizations	No longer available

Programat® CS2
Software Revision Log

V1.1 06.06.2014	**Software optimized** • The software was attuned to meet the requirements of the Programat App (for iPhones) and various software optimizations implemented. • The software was optimized to meet the requirements of the PrograBase X10 Software. As a result, more functions with regard to PrograBase X10 are available with the Programat CS2.	No longer available
V1.0 20.09.2013	**Basic version**	No longer available

Version 12.01.2024
