Programat® EP3010
Software Revision Log

Version	Changes from previous version	Status
V7.5 14.08.2025	**Software optimized** • New programs for IPS e.max Ceram Art • Various software optimizations	Currently delivered version
V7.4 12.01.2024	**Software optimized** • Various software optimizations	No longer available
V7.2 25.04.2022	**Software optimized** • Optimized parameters for IPS e.max Press LT programs	No longer available
V7.1 03.09.2021	**Software optimized** • Optimized vacuum parameter (Program 265) • Various software optimizations	No longer available
V4.4 22.06.2020	**Software optimized** • FPF-function has been improved • Various software optimizations	No longer available
V4.3 08.07.2019	**Software optimized** • FPF-function has been improved • Various software optimizations	No longer available
V4.2 11.03.2019	**Software optimized** • FPF-function has been improved • New program for IPS Style paste opaquer • Optimized vacuum test program • Optimized dehumidification-function • More special characters • Acoustic feedback of touchscreen • Various languages have been improved • Various software optimizations	No longer available
V4.1 01.02.2018	**Software optimized** • Push function can be tested • A copy wizard is now available • Press data are visible for a longer period of time after the press process • Various languages have been improved • Various software optimizations	No longer available

Programat® EP3010
Software Revision Log

V4.0 28.04.2017	**Software optimized** • Now with FPF-function (Fully automatic Press Function) • New program structure with new program parameters for IPS Style, IPS e.max Press Layering Technique, IPS e.max ZirPress Layering Technique, IPS e.max ZirCAD Staining Technique, IPS e.max CAD Crystall/Glaze, IPS e.max CAD Layering Technique, IPS e.max CAD Layering Technique, IPS d.SIGN, IPS e.max ZirCAD Layering Technique • Optimized Vacuum test program • Various software optimizations	No longer available
V3.0 08.04.2016	**Software optimized** • New programs for IPS Style, IPS Ivocolor and IPS e.max Press MT • In-process dehumidification: Function that protects the vacuum system from contamination and its consequential damages • Various software optimizations	No longer available
V2.1 09.04.2015	**Software optimized** • Various software optimizations	No longer available
V2.0 01.10.2014	**Software optimized** • New firing programs for IPS InLine Powder Opaquer (P21, P221, P241) • New press programs for IPS e.max Press Multi • Various software optimizations	No longer available
V1.1 06.06.2014	**Software optimized** • The software was attuned to meet the requirements of the Programat App (for iPhones) and various software optimization measures were implemented	No longer available
V1.0 10.05.2014	**Basic version**	No longer available

Version 14.08.2025
